3. (Twice Amended) A protein [comprising] consisting of a grafted optimized protein surface loop that specifically binds a selected target, wherein the protein surface loop is not endogenous to the protein, replaces a surface loop on the protein, and [is optimized prior to grafting] wherein the protein is not an antibody.

13. (Twice Amended) The [targeted agent or] protein of [any of claims 1 or] claim 3⁶⁷, wherein the target is a biological entity.

14. (Twice Amended) The [targeted agent or] protein of [any of claims 1 or] claim 3⁶⁷, wherein the target is an organ, tumor, tissue, cell, virus, or microorganism.
